

# Comeau Aerospace Inc. - Advanced Projects

## The Ultimate Flying Machine Design Engineering Projects

### **CAI-818 Ghost : ACI Fantôme**

- a series of flying wing ultimate flying machines ;
- custom variable optical visual effects ;
- velocity and agility - high thrust to weight performance ;
- multi-phase generator and transducer array ;
- multi-phase detection, tracking, analysis and scenario options ;
- comprehensive reconnaissance, communication and navigation ;
- conventional and advanced electro dynamic propulsion ;
- extremely quiet and low signature and doppler effects ;
- all weather extreme environment – true mission capacity!
- multi-mission tasking modules and deployment options;
- command and control tasking ;
- extreme maneuverability and pilot handling ;
- holographic and acoustic projection technology ;
- ascension and the art and science of really being invisible without being dead ;

The science and multi-dimensional physics of being invisible...  
you might have an idea of what that is about, right?

When was the last time you have seen a ghost?  
Or phenomena and experiences you could not explain?

Isn't it time to live on the edge of fantastic possibility?  
What if fantastic is science, art and magic?  
Imagination and work creates in the atmosphere of unlimited possibility.

Do you need a good explanation about the nature of reality?

The transformation of consciousness...  
is just a step away into another dimension...  
We each have the capacity to shift the space time dimension...

We can create an alternate reality...  
A future and the ever present moment of right now,  
with more possibilities than ever before...  
a new form of stealth, logistics and performance
